SURVEY

We want everyone in the community to have a voice in this process.

We thank you for your input!

WHAT

Indiana Borough is developing an Active Transportation Plan to make walking, biking and other modes of active transportation in our community safer, easier and more accessible for everyone. Active transportation is any self-propelled mode of transportation, such as walking, bicycling, e-assisted bikes and scooters, roller blades, skateboards, wheelchairs and even pushing a stroller. Active transportation also includes forms of Public Transit.

TOPICS

An on-line Community Survey and Interactive Map Program have been created to gain input from residents of Indiana and neighboring communities. We want to know about the biking and walking enhancements, trail connections, facilities and amenities, safety and access improvements and connections to community destinations that you want to see in our community.
